

HTT-10XL-RPV Robotic Massage[®] Chair

The Rotating calf and foot massage footrest massages your calves or your feet.

The science of comfort.

The HTT-10XL-RPV is the culmination of years of research and development which has led to this extraordinary system that emulates techniques used by massage and chiropractic professionals for back and spinal care.

Human Touch Technology[®] starts with a multi-patent and patents pending mechanism that works like "wrists and arms".

"The hands" - massage rollers move three-dimensionally to approximate the human touch.

Exclusive features

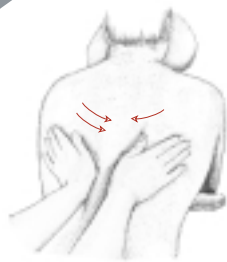

- **Human Touch Technology[®]** - the most advanced robotic massage system available.
- **Quad-Roller** is designed to follow the curve of your spine and offers an enhanced massage in the cervical and lumbar region.
- **4 Massage Functions** including Rolling, Kneading, Compression, and Percussion in multiple speeds.
- **1 Programmed Session** allows you to sit back, relax and enjoy a 15 minute pre-programmed massage session with the touch of a button.
- **Power Recline** allows you to adjust the back of the chair with the hand-held controller.
- **Rotating - Robotic Calf & Foot Massage System** has 2 speeds and 1 program mode.
- **Soft supple material** that looks, feels and is as durable as leather.
- **Padded armrest for comfort.**
- **Ergonomic designed headrest.**
- **Range Control** to customize the location of the kneading and compression functions.
- **Rugged construction** and virtually maintenance-free.

"HTT" is the preferred technology of the ACCO.

Compression

The massage modality that is only available with HTT is the one doctors use most for spinal and back treatment. Its unique combination of alternating strokes and pressing on the paraspinal muscles can help improve mobility, flexibility and overall posture. The compression mode also "rocks" your body, taking you to a more relaxed state of mind.

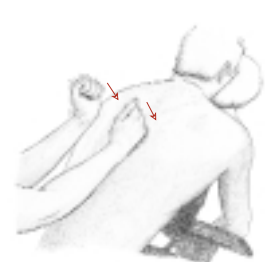

Rolling

Feel the tension dissolve with the gentle rolling massage. Rolling delivers the same benefits as effleurage, the first part of a massage performed by a professional therapist. It warms up and loosens the muscles to prepare your back for a deeper therapeutic massage.

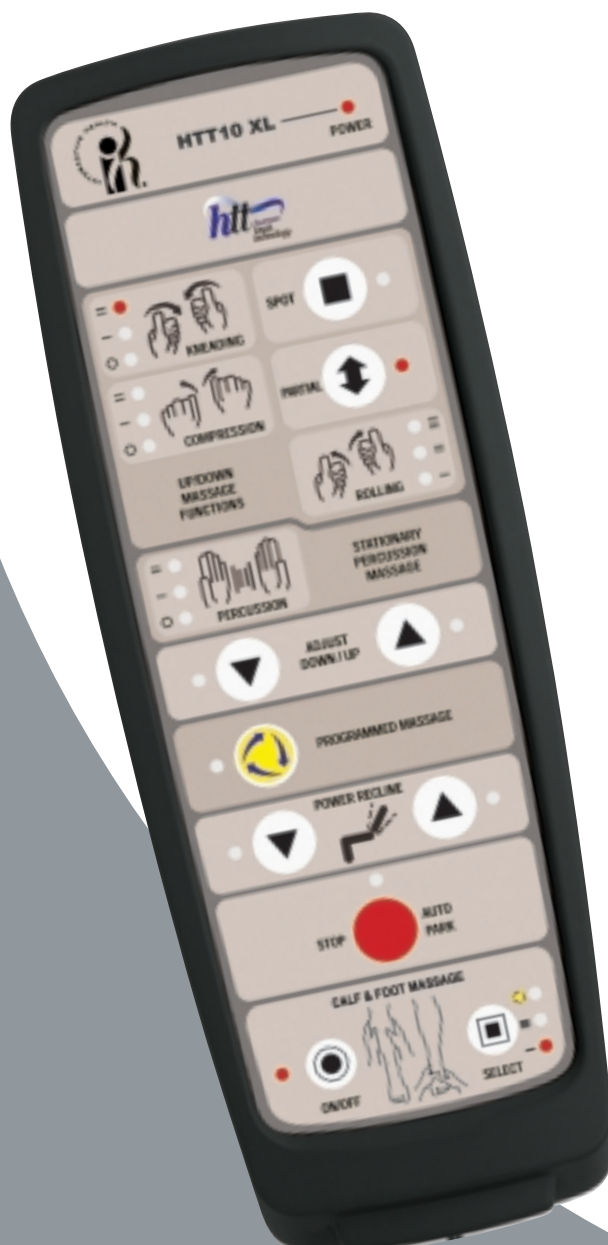

Kneading

Ease soreness and work out the "knots" with a deep kneading massage. Slightly more intense than rolling, the circular motion of the kneading function lifts and stretches back muscles, improving circulation and bringing vital nutrients to the spinal area.

Percussion

Feel invigorated by the sensation of hands rapidly tapping on your back muscles. The percussion massage deepens the level of relaxation and helps replenish energy.

Functions

Rolling:	3 speeds
Kneading:	2 speeds
Compression:	2 speeds
Percussion:	2 speeds
Range Controls:	2 functions
Adjust Manual Up/Down:	For Kneading, Compression and Percussion
Programmed Massage Session:	Invigorating (15 min. total program)
Backrest:	Power Recline
Calf & Foot Massager:	2 speeds, 1 program

Specifications

Operating Voltage:	110/120 V ~ 60 Hz (Ground)
Power Consumption:	150 Watts
Approval:	cETL
Size:	Chair (reclined) 28"W x 54"L x 32"H
Weight:	135 Lbs.
Recline Angle:	115 - 155 Degrees
Number of Massage Functions:	Four (4)
Programmed Function:	1 Individual Program
Massage Head Storage:	Top
Automatic Timer Shut-Off:	15 minutes (approx.)
Total Massage Stroke Length:	21.0 Inches
Cover Fabric Material:	Vinyl
Warranty:	Limited one-year warranty
Included:	Handheld Remote Control Massage Softening Pad
